Portfolio: brendafabri.github.io/portfolio-projects · GitHub: github.com/brendafabri

PROFESSIONAL SUMMARY

Senior Business Analyst specializing in process redesign and automation & AI delivery, with 7+ years of experience. I map the process, identify friction and manual handoffs, prioritize by impact, deliver to production and measure time saved and errors avoided, iterating with users. Track record: 18,000+ emails classified and routed with no manual triage, 350+ hours/year of manual work eliminated, and assessment cycles for ~135 suppliers redesigned end to end. Stack: Power Automate, Power Apps, Office Scripts (TypeScript), UiPath, n8n and Google Apps Script; Power BI; LLMs/RAG; Microsoft 365 and SAP SD/FI (self-taught). Microsoft Certified: Azure AI Fundamentals (AI-901); Salesforce in training. Master's in Digital Transformation (2025). Spanish native, English C1, Italian B2.

WORK EXPERIENCE

Process Optimization & Automation Specialist | Lyreco — Aug 2026 – Present

Business process analysis, identification of improvement points and automation with the tools available: Power Automate, Power Apps, Office Scripts (TypeScript), UiPath and Microsoft 365.

- **Sustainability Assessments:** End-to-end redesign of the assessment cycle: a 109-column consolidated file is split into one file per supplier (~135), sent out, and ~900 response rows are re-consolidated into the PIM import format. Manual steps and handoffs removed, human review only on exceptions — 9 person-days per cycle eliminated, using only standard Microsoft 365 connectors.
- **Annual Cost Request:** End-to-end redesign of the campaign: per-supplier extraction from a ~40,000-row master catalog, generation of each price file and an email with 2 attachments ready in a shared mailbox; people only review the draft before sending — ~300 suppliers per campaign.
- **Compliance Documentation Mailing:** End-to-end redesign: joins the product and packaging databases, generates only the files that contain data and sends bilingual ES/EN emails with 1–2 dynamic attachments; human review only on exceptions.
- **Marketing Process Map:** AS-IS mapping of 4 processes and 33 steps by owner and status, and identification of automation and AI opportunities, in a Power Apps app; team proposals come in through Forms and a flow logs them in SharePoint — no Premium licences.

Business Analyst & Process Automation Manager | Diplonautic SL — 2025 – Jun 2026

Process analysis, improvement proposals and automation with Google Workspace, Apps Script (JavaScript) and Excel.

- **Invoice Classifier:** Intelligent classification and routing of incoming documents in Gmail with 5 detection layers (bilingual ES/CA OCR, XML parsing, multi-signal scoring) that removes manual triage — 18,000+ emails classified, 700 invoices/month, 0 human intervention.
- **Holiday Notice Automation:** Automated third-party touchpoint in Power Automate: detects holidays 5 days ahead and notifies 500+ suppliers, removing a recurring manual handoff — 7,000+ emails/year, 350 h of manual work eliminated, 0 duplicates.
- **HR Hours Control:** Cognitive load reduction: the monthly hours audit of 56 workers, which required cross-checking 5 sources by hand (ERP, vacations, corrections, travel, config), is now generated automatically in Excel — 3 days/month of manual processing eliminated.
- **Article Registration Form:** Google Apps Script web app standardizing nautical parts catalog entry across 23 technical fields with live search over 300+ hierarchical categories.
- **Technical Inventory → Sheets:** Automated naval parts inventory via Google Drive API and regex filename parsing — 100% of manual data entry eliminated.
- **Power BI & Generative AI:** Operational KPI dashboards with automated refresh, and LLM/RAG integration in internal workflows, reducing document processing time by 60%.

Business Analyst & Operations Manager | Planes de Ahorro — Yacopini Motors 2017 – 2024

- **Business Process Analysis:** Identified inefficiencies across HR, finance and administration; redesigned workflows resulting in a 75% reduction in operational errors.
- **Automation & Tooling:** Excel/VBA solutions for commission calculations, payroll processing and database management across multiple business units.
- **CRM & ERP:** Advanced use of SIAC (7 years) and MS Dynamics 365 — orders, invoicing, sales pipeline, reporting and campaigns.
- **KPI Reporting:** KPI frameworks for Volkswagen, Nissan and Chevrolet brands, enabling data-driven performance reviews.
- **Leadership:** Direct team of 5+ with indirect oversight of 100+ staff; cross-functional coordination between sales, logistics and finance.
- **Recognition:** Chevrolet President's Award for 3 consecutive years and Best Administration Team for error-free contract processing.

Additional experience | Administration & customer service 2011 – 2017

- Cashier Manager, Pago Fácil · Private Clinic Administrator · Tour Guide & Office Administrator — financial transactions, document management and multilingual communication.

EDUCATION

- Master's Degree in Digital Transformation — Business School IOE (2025)
- Bachelor's Degree in Business Administration — Universidad Nacional de Cuyo (2016)

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals (AI-901) — Microsoft (2026) · Applied Generative AI — Desafío Latam (2024) · Data Analyst & Power BI — LinkedIn Learning (2024) · Foundations of Generative AI — Desafío Latam (2024) · SCRUM Fundamentals — LinkedIn Learning (2024) · UX/UI Design — Codo a Codo (2023) · JavaScript & React — Coderhouse (2022/2023)

TECHNICAL SKILLS

Business Analysis	Process mapping (AS-IS/TO-BE), friction & handoff analysis, requirements elicitation, UAT, business workshops, change management & adoption, BPMN, Agile/SCRUM
Automation & AI	Power Automate, Power Apps, Office Scripts, UiPath, n8n, Google Apps Script, LLMs/RAG, conversational AI design (intents, fallback, grounding), prompt engineering, OCR, REST APIs
Microsoft 365	SharePoint, Outlook, Advanced Excel, Teams, OneDrive, Power Platform
Data & BI	Power BI, DAX, SQL, data modeling, KPI dashboards, reporting
Development	TypeScript, JavaScript, HTML, CSS, React, webhooks, Google Workspace
ERP / CRM	SAP SD & FI (self-taught), SIAC (advanced), MS Dynamics 365, Salesforce (in training: Trailhead Agentforce, Flow, AI Associate)
Project tools	Jira, Confluence, Trello, Notion
